

STAGE 1

Contributed records

52

survey record IDs

50

wearable logger exports

1,827

activity-log entries

Wearable measurements + structured context

STAGE 2

Linkage + quality control

47 contributors

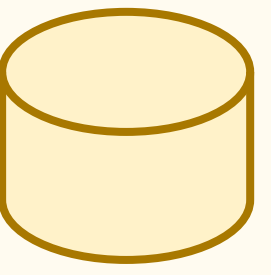

included in the curated cohort

Documented exclusions

3 logger records excluded
2 survey records without a linked logger
64 activity entries excluded or unlinked

One-minute harmonisation

43 × 10-s + 4 × 60-s streams
46 explicit gaps retained as missing

STAGE 3

Linked public data package

shared opaque participant_id

light_1min.csv

141,000

participant-minutes

events.csv

1,763

event intervals

participant_metadata.csv

47

participant rows

travel_segments.csv

3

travel intervals

Four analysis units • one linkage key

Release safeguards

Direct identifiers, device serials, free text and raw flight numbers removed • one-minute gaps preserved as missing • device-specific light semantics retained
